

1.0 PURPOSE

The purpose of this policy is to determine the commitments and targets of Naturel Holding and its Subsidiaries regarding improvement of energy efficiency in all their operations and activities.

Together with its *Environment Sub-Committee* Naturel Holding and its Subsidiaries continuously work to improve the energy efficiency standards in line with local and international best practices.

2.0 SCOPE

This policy covers the energy efficiency management principles of Naturel Holding and its subsidiaries in accordance with ISO 50001 Energy Management System standards.

Implementation of energy efficiency strategy is supported by *Environment Sub-Committee* that regularly meets, assesses important metrics, ensures best practices are implemented, recommends improvements and projects and communicates these to the CEO and the Executive Committee.

3.0 PRINCIPLES and APPLICATIONS

Naturel Holding and its Subsidiaries are committed to:

- operating in line with their corporate values: Sustainability, Innovation, Collaborations, Equality and Inclusion, Transparency and Accountability, to improve energy efficiency in all business lines and operations,
- supporting a low carbon economy, contributing to the global 2050 net-zero emissions and COP28 targets by increasing the renewable energy capacity and energy efficiency in all business lines and operations,
- increasing renewable energy capacity by investing in new climate technologies and providing EPC services to install renewable energy plants,
- increasing energy efficiency by increasing the consumption of renewable energy with new climate technologies, such as battery storage solutions, AI supported systems, and other new climate equipments and technologies,
- collaborating with stakeholders for developing innovative solutions for new climate Technologies to increase energy efficiency,
- complying with relevant laws, regulations, international standards to improve energy efficiency,
- reducing energy consumption from heating, cooling, transportation and lighting by using more energy efficient products, services and solutions,
- supporting to increase energy efficiency in entire value chain by raising awareness among their internal and external stakeholders about energy efficiency and increasing sustainability vision,
- supporting equality and inclusion in renewable energy access by providing installation of solar power plants (up to 10 KW) for low income customers (retail, small businesses) at a reduced service fee that will allow us to achieve 25% of their usual profit margin.

Reviewing of Policy

This Policy is reviewed with Corporate Governance Committee once a year to evaluate its effectiveness and make necessary improvements.
